حل الميدتيرم
م. إسراء مراد

Tanta University — Department: Computers and Automatic Control — Total Marks: 20 Marks — Faculty of Engineering

Course Title: Computer Technology | Course Code: CCE0101 | Year: Preparatory
Date: November 2019 | Allowed time: 30 Min. | Model: A

Q.1) Choose the correct answer : **(13 Marks)**

1.1) Freeware software available via FTP: ......

A) The author permits you to use it free.
B) The author carries no copyright.
C) You can use for short-term for evaluation.
D) None of these.

1.2) It is specified as a main memory

A) Hard disk   B) CD/DVD   C) RAM   D) Floppy disk

1.3) It is specified as a non-volatile main memory

A) Hard disk   B) RAM   C) ROM   D) All the above

1.4) Which one of the following is not an application software package?

A) Avera antivirus   B) Red hat Linux   C) Microsoft Office   D) All the above

1.5) The input device to the computer is

A) A mouse   B) A keyboard   C) A touch screen   D) All the above

1.6) Which of the following is the most powerful type of computers?

A) Super conductor   C) Microcomputer
B) Super computer   D) Mainframe

1.7) EEPROM stands for ....

A) Electronically Erasable Programmable Read-Only Memory
B) Electrically Erasable Programmable Read-Only Memory
C) Electrically Enabled Programmable Read Only Memory

1.8) The process of copying data from a memory location is called ....

A) Writing   B) Booting   C) Reading   D) Controlling

1.9) Operating system manages

A) Memory   B) Processor   C) I/O devices   D) All the above

1.10) The primary job of the Operating System is ....

A) manage commands   B) manage resources   C) manage programs

1.11) In which of the operating systems, the response time is very crucial:

A) Batch operating systems   B) Time-Sharing systems   C) Real time operating systems

1.12) ....is a GUI operating system produced by Apple.

A) Mac OS   B) Windows   C) Unix   D) OS/2

1.13) Unix operating system is ....

A) Multitasking operating system   C) Multiuser operating system
B) Time sharing operating system   D) All the above

1.14) URL stands for............

A) Universal region locator   C) Universal resource locator
B) Uniform resource locator   D) None of these

1.15) Messages are first screened and perhaps combined before sending them to subscribers in ....

A) Moderated mailing lists   C) Open mailing lists
B) Closed mailing lists   D) None of these

1.16) FTP is ....
  A) Internet browser
  B) Search engines
  C) Internet protocol ✓
  D) None of these

1.17) Telnet is .... and used in ....
  A) Internet browser, displaying web pages
  B) Internet protocol, remote log in ✓
  C) Internet protocol, file transfer
  D) Internet protocol, transferring web pages

Q.2) State if each of the following statements is True or False: **(7 Marks)**

2.1) A server is a computer on a network that provides a service to other computers. **T**

2.2) Hardware is the physical parts of a computer system that you can see and touch. **T**

2.3) A company needs its products and service to be known for the public is an example for information consumer. **F (provider)**

2.4) Peer-to-peer networks are more commonly implemented where smaller than ten computers are involved. **T**

2.5) MS. Windows is the first GUI operating system. **(F) Mac os (Apple's)**

2.6) Computer output is information that has been produced by a computer. **T**

2.7) In search window of Windows, a wildcard character is a special symbol that stands for one or more unknown characters. **T**

2.8) Unix is a command-driven-interface operating system. **T**

2.9) Compilers convert the source code into the object code in a low level languages. **(F) high**

2.10) In batch processing, user can interact with a computer. **F**

2.11) Operating system is the first hardware controlling program after pressing the power button in personal computers. **T**

2.12) Log Off command in MS.Windows is used to switch between the different users of computer. **T**

2.13) The file management is the core of an operating system. **F (Kernal)**

2.14) User friendly is computer software or a hardware that is simple to set up, run and use. **T**
